DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Steve M. Perry on 12/09/2010.

The application has been amended as follows:

Claim 31: An article of manufacture, comprising:

a non-transitory computer usable medium having computer readable program code embodied therein for distributed processing of print jobs using multiple printer processors and centralized printing, the computer readable program code in the article of manufacture comprising:

computer readable program code for dividing a print job into a plurality of print job segments in a print distribution module;

computer readable program code for transmitting the plurality of print job segments to one or more distribution responsive printers;

computer readable program code for processing the plurality of print job segments into a plurality of print engine-ready data segments using the one or more distribution responsive printers;

computer readable program code for assembling the plurality of print engine-ready data segments from the one or more distribution responsive printers at the print distribution module; and

computer readable program code for printing the plurality of print engine-ready data segments at a target printer when the plurality of segments is received from the print distribution module.

Allowable Subject Matter

2. Claims 1-31 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record do not teach or suggest the claimed limitation of assembling the plurality of print engine-ready data segments received from the one or more distribution responsive printers at the print distribution module.

The most relevant prior art Barry (US Patent Number 7,099,027 B1) disclosed a method (Abstract; Figs. 1a, 1b; col. 5, 11. 1-49) that is similar to the disclosed invention for distributing printer processing (Spec. 2:17-25; 5:4-25). However, Barry does not explicitly teach the applicant's claimed to operate on post-RIPping files or print engine-ready data segments See also Decision on Appeal 2009-0006974.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Hilina Kassa whose telephone number is (571) 270-1676.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Moore could be reached at (571) 272- 7437. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
